Quality Management System Software & Training

TQS-9000 is a powerful quality system management tool built to provide reliable administration of your data. TQS-9000 is designed with several modules that include: APQP, Gage Tracker 9000, Corrective Actions, Quality Documents, Engineering Documents, Employee Training, Preventative Maintenance, Manufacturing Data, Visual Aid and External Document Management, and much more... Each module is designed to optimize the input and retrieval of your data. Forms are designed for ease of use and provide seamless on screen help for each data entry field, while extensive report options allow our customers to sort and view data in several ways to assist in their decision making process. Built in wizards assist in building APQP Projects, copying entire projects to a new project number, moving projects, and exporting projects. Entire APQP projects may be stored in an approved library, a work-in-process library, or stored in archives. All document revision level control is automated within TQS-9000 eliminate the need for the manual maintenance of a document revision list. Print revision level lists at the touch of a button. TQS-9000 also provides for the use of visual aids within many modules to assist the document users. Data sorting, filtering, and searches allow users to quickly and efficiently retrieve specific information on the fly.

TQS-9000 is a split database design allowing for your data to be stored on a network drive and accessed from local machines. All updates are immediate and visible to all users. An internal security manager allows for securing your data. Each user or department is granted permissions for read only, data update, or completely locked out from the forms or reports of your choice. At startup TQS-9000 provides overdue item reports to assist managers to monitor tasks. All reports may be sent by email to provide updates to internal or external customers. The TQS-9000 Migration Tool and TQS-9000 Report Viewer add-ons can add even more flexibility to your system. A yearly maintenance agreement provides customers with free access to updates and special offers at their own web page on our web site.

Requirements for TQS-9000:

- Windows 98 SE, XP, NT 4.0 or above, Vista, Windows 7
- Pentium 133 Processor or above. (Suggested)
- 90—130 Mb of Disk Space
- 100 bps Network Connection suggested for network installations
- CD Rom Drive for Installation (May be copied to a network drive for installation)
- Internet connection to retrieve frequent updates

TQS-9000 Features

Gage Calibration, Gage Procedures and Instructions, Vendor Information, Calibration Instructions with Visual Aids, Active and Non Active Gage Listings, Gage Checkout Tracking, Gage Repair Tracking Capabilities, R & R, Gage Issue and Request Forms, and more....

Employee Training:

Schedule Employee Training, Develop Training Evaluation Forms, Job Descriptions, Phone Lists, Employee Information, Training Needs Assessment.

Preventive Maintenance:

Machine History, PM Schedules, Resource Allocation, Scheduled and Unscheduled Activity Tracking, Replacement Part Listings, PM Instructions with Visual Aids and Links to Blueprints or Manuals.

Manufacturing Data:

Track Efficiency/Productivity, Record and Track Downtime, Develop Takt Time Studies, and Track Labor Variance.

Security:

Set Security by Department or Individual for Full Access, Limit Data Change Capabilities, Allow Read Only Access or Lock Specific Areas out From All Access Capabilities. Access Rights may be Changed by the Administrator in Seconds.

Program Features:

Designed in Microsoft Access 97 and is Compatible with Windows 95 SR1, 98, ME, or NT 4.0 and above. On Screen Help Built Into Each Field on All Forms along with a Windows Help File. Search and Filter Data from any Form, Extensive Report Options to View Data in Several Ways to Assist in the Decision Making Process. Advanced Report Filters Allow the User to Customize any Report. Split Database Design for Installation Across Your Network and Access From Off-Site Locations. TQS-9000 Migration Tool and Report Viewer Add-Ons are Available to Provide Increased Flexibility. Internet Connection to the ISP Customer Support Pages. Ability to Connect to the Main Data File or a Test Environment for Training, Customer Logos Appear on Several Reports. Send or Save Reports in Several Formats. The Yearly Maintenance Agreement Keeps Your Program Up to Date, Includes Free Upgrades When New Modules are Added to the Version You Selected, Customer Support Web Page on Our Web Site to Download Updates, Obtain Special Offers, Free Software, and Links to Many Helpful Resources.

ISP Support:

Frequent Updates. Customer Request for Change Evaluations, Training for ISP Products Available along With Internal Auditor Training for ISO-9001:2000 / TS16949. Web Support and Customer Support by Phone.

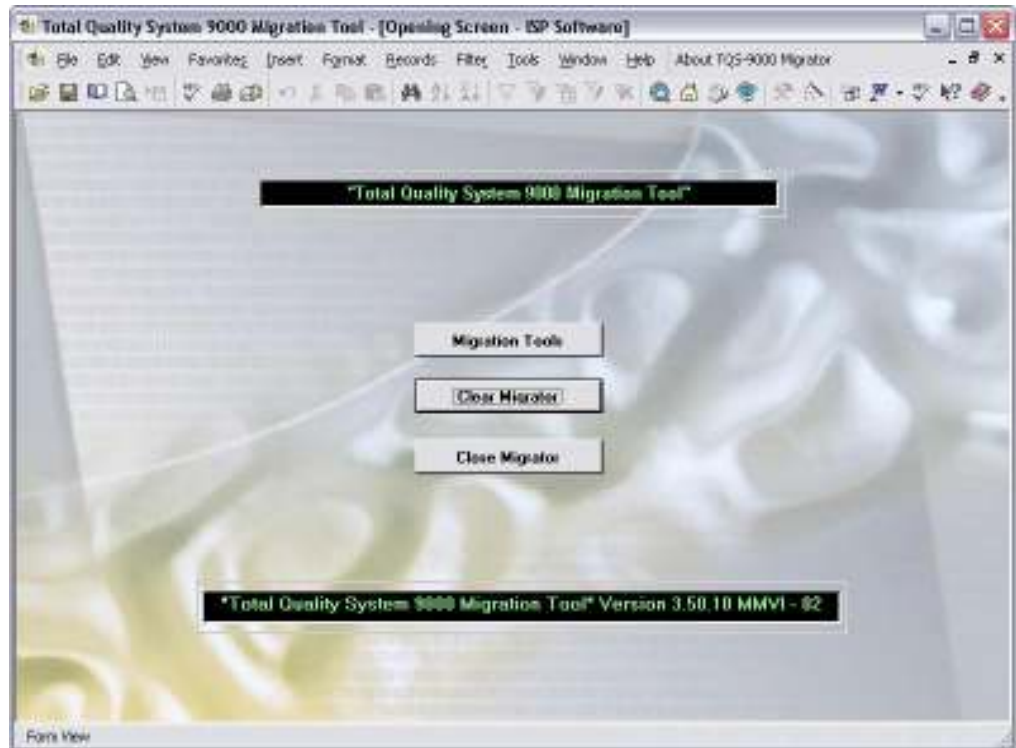

TQS-9000 Migration Tool

**Quality Software,
Training, & Consulting
Solutions for Any Size
Business**

Quality Management System Software & Training

The TQS-9000 Migration Tool was Developed with the User in Mind. The Migration Tool Allows for Exporting a Complete APQP Project from the TQS-9000 Main Program into a Small Database File that Can be Transferred Off-Site. All Data Regarding the Project Including the Control Plan, FMEA, Flow Chart, Work Instructions, and Project Log are Copied into the Migration Tool. The Migration Tool Allows the User to Make Updates to the Project when not Connected to the Main Data File. Projects May Copied to New Project Numbers or the Project Number Changed Within the Migrator. Changes Can Then be Exported Back to the Main Data File.

Features:

The TQS-9000 Main Program Allows the User to Export an Entire APQP Work-in-Process or Approved Project Into the Migration Tool. The data is Transferred Into a Small Database File that Can be Easily Transported Off-Site for Modification or Updates. Perfect for Use at Home or a Customers Location. The TQS-9000 Main Program Contains a Feature to then Lock the Data for this Project so no Inadvertent Updates are Made to the Project While the File is Out for Modification. The User of the Migration Tool May Update Data, Add Process Steps, Add Work Instructions, and Preview the Changes from an Off-Site Location. Changes are then Exported from the Migration Tool Back to the TQS-9000 Main Program. To Assure the Updates are Properly Recorded the Migration Tool will Automatically Export All Projects Back Into the TQS-9000 Work-in-Process Library so the Appropriate Revision Updates May be Made Prior Moving the Project Back Into the Approved Library. ISP Software Offers a Yearly Maintenance Agreement for the Migrator to Assure You May Stay Updated to the Version Level You Select. The TQS-9000 Migration Tool is Easy to Use and Increases the Flexibility of Your TQS-9000 Main Program. All APQP Forms and Reports in the Migrator Match Those Found in the TQS-9000 Main Program to Provide Consistency for the User. All Reports Printed From the Migration Tool Indicate they are Unapproved Documents to Guard Against the Accidental Distribution of an Unapproved Document.
